PROFESSIONAL SUMMARY

DevOps Engineer with hands-on experience managing cloud infrastructure supporting 99.9% uptime across EC2, EKS, and Lambda environments. Built 5+ CI/CD pipelines using Jenkins, GitLab, and Argo CD, reducing deployment time by 40%. Skilled in Infrastructure as Code (Terraform), Docker containerization, Kubernetes orchestration, and monitoring with Prometheus and Grafana. Proven ability to automate workflows, improve system reliability, and collaborate with cross-functional teams in Agile environments.

PROFESSIONAL EXPERIENCE

- HinsanLabs Pvt. Ltd., DevOps Engineer** 07/2025 – Present
- Managed AWS cloud infrastructure (EC2, S3, RDS, VPC, IAM, Route53, CloudWatch) supporting **99.9% uptime** for 5+ production applications, ensuring high availability and performance.
 - Designed and implemented **5+ CI/CD pipelines** using Jenkins, GitLab, GitHub, AWS CodePipeline, and CodeBuild, reducing deployment cycle from **3 hours to 20 minutes**.
 - Containerized **8+ microservices** using Docker and deployed on Kubernetes clusters, improving deployment consistency and Reducing environment setup time by **60%**.
 - Automated provisioning of **25+ AWS resources** using Terraform modules and configured servers with Ansible, eliminating **4+hours/week** of manual infrastructure work.
 - Configured ALB with Auto Scaling groups across **3 Availability Zones**, handling **500+ concurrent requests** with zero downtime during traffic spikes.
 - Administered **10+ Linux servers** (CentOS, Ubuntu) including installation, patching, and troubleshooting, reducing system incidents by **30%**.
 - Built monitoring dashboards using Prometheus, Grafana, and Datadog
configured CloudWatch alarms to detect issues, achieving **mean-time to-detection (MTTD) under 5 minutes**.
 - Managed GitLab server upgrades, GitLab Runners, and automated backup processes, ensuring **zero data loss** across CI/CD environments.

SKILLS

Cloud Platform: AWS (EC2, VPC, S3, ALB, IAM, RDS, DynamoDB, Amazon Aurora, SNS, Lambda), Azure and GCP

DevOps & CI/CD: Docker, Kubernetes, Jenkins, Terraform, Argo CD, Git, GitHub

Infrastructure as Code: Terraform, Ansible, AWS CloudFormation

Security & Scanning: SonarQube, Trivy, AWS IAM, Kubernetes

Monitoring & Observability: Prometheus, Grafana, CloudWatch, Datadog, Node Exporter, ELK Stack (Elasticsearch, Logstash, Kibana)

Operating Systems & Scripting: Linux (CentOS, Ubuntu), Shell Scripting (Bash), YAML

Linux & Networking: Linux Administration, system configuration, TCP/IP, DNS, HTTP/HTTPS, Load Balancing

Version Control: Git, GitHub (webhooks)

Programming language: Python

PROJECTS

- GitOps-Driven Multi-Microservice Platform on Amazon EKS** 🏆 , Amazon EKS | Argo CD | Helm | Jenkins | Docker | Prometheus | Grafana
- Designed and deployed a containerized microservices application on Amazon EKS, enabling scalable architecture across six services and improving deployment efficiency by 40%.
 - Implemented GitOps-based CI/CD using Argo CD with automated self-healing and drift detection, reducing manual intervention by 70%.
 - Created reusable Helm charts with environment-specific configurations (dev, staging, prod), speeding up deployments by 50% and ensuring consistency.
 - Integrated Prometheus and Grafana for monitoring, improving system visibility, and achieving 99.9% uptime with proactive alerting.
 - Optimized Kubernetes resource utilization using autoscaling (HPA), reducing infrastructure costs by 30% while maintaining high performance.
- Automated Kubernetes Deployment with Jenkins and Container Security** 🏆 , Jenkins | Docker | Amazon EKS | Trivy | SonarQube | Amazon ECR
- Built a multi-stage Jenkins CI/CD pipeline for automated builds, code quality checks (SonarQube), security scanning (Trivy), image creation, and deployment to Amazon EKS, reducing manual effort by 40%.
 - Improved container security by scanning images for vulnerabilities and blocking deployments on critical issues, reducing security risks by 60%.
 - Deployed applications on Kubernetes using YAML files with health checks, ensuring zero-downtime updates and improving application uptime to 99.9%.
 - Managed Docker images in Amazon ECR with automated cleanup, improving version tracking and reducing storage usage by 30%.
 - Reduced deployment time by 50% by optimizing pipeline stages and parallel execution, enabling faster and more reliable releases.

EDUCATION

B.Tech - Computer Science and Engineering,
Dr. Daulatrao Aher College of Engineering Karad, Shivaji University
CGPA: 8.3/10

11/2021 – 05/2025

CERTIFICATION

AWS Certified Cloud Practitioner, Amazon Web Services

01/2026
